CAREER OBJECTIVE

Results-driven Computer Science student with strong problem-solving skills and experience in building scalable software systems. Proficient in Java, Python, and full-stack development with hands-on experience in REST APIs, cloud technologies, and system design fundamentals. Seeking an opportunity to contribute to high-performance and secure software solutions.

EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology (VNRVJIET)

2023–2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.55

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Development : HTML, CSS, JavaScript, React.js, Next.js, Node.js, FastAPI, MERN Stack

Backend & API : Postman, REST APIs

Database Technologies : MySQL, MongoDB

Tools : Git, GitHub, Tableau, Power BI

Cloud & DevOps : Docker, GCP, Google Kubernetes Engine (GKE), Terraform, GitHub Actions

Development Tools : Github Copilot, Antigravity, Cursor, Github CLI

EXPERIENCE

Software Engineering Intern – 1vite.ai

Oct 2025 – Dec 2025

- Developed scalable full-stack features for an AI-powered photo-sharing platform using Next.js, FastAPI, and Python, and built optimized RESTful APIs for efficient data processing.
- Implemented AI/ML-based photo processing features and gained experience deploying applications on AWS and GCP.

PROJECTS

AcadLink | *React.js, FastAPI, MongoDB, Tailwind CSS*

- Built a college academic management platform with role-based access, QR/code-based subject enrollment, content sharing, assignments, MCQ tests, chat, and performance tracking to streamline faculty-student interaction.

1Vite | *Next.js, FastAPI, Python, Docker, AWS, GCP*

- Enhanced an AI-powered event invitation platform by building full-stack modules, optimizing backend APIs, integrating image-processing features, and supporting scalable cloud deployments to improve user experience and platform reliability.

DASH | *MERN Stack*

- Built a smart scheduling assistant with an interactive UI, enabling users to efficiently manage and prioritize tasks using features like reminders, progress tracking, and conflict detection.

Sendy | *React.js, FastAPI, MongoDB, TailwindCSS*

- Developed Sendy, a no-login text and file sharing platform using FastAPI and React, where users create domains with optional passwords and access content via URL or QR code.

CERTIFICATIONS

- Learned fundamentals of Large Language Models, prompt engineering, and AI-based application development [Certificate]
- Covered core Python programming concepts, data structures, and problem-solving techniques [Certificate]
- Gained strong understanding of Object-Oriented Programming concepts using Java [Certificate]
- Learned core Artificial Intelligence concepts, machine learning basics, and real-world applications [Certificate]

ACHIEVEMENTS & ACTIVITIES

- Led a team in Turing Cup 2k25, a competitive programming contest organized by TuringHut, VNRVJIET, demonstrating strong problem-solving and leadership skills.
- Advanced to the 2nd round in Smart India Hackathon (2025) for developing an AI-based Smart Allocation Engine.
- Core Member of Vignana Jyothi Sahithivanam, VNRVJIET, actively leading initiatives to promote Telugu language and cultural engagement.
- Organized and coordinated multiple literary and cultural events, enhancing student participation and club outreach.
- Engaged in competitive coding through ACM Winter Coding Contest, strengthening algorithmic and analytical skills.
- Developing industry-relevant skills in cloud consulting, scalable systems, and problem-solving through PwC Launchpad'26 program.
